

Name: _____ Date: _____

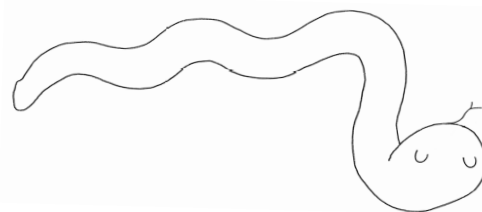

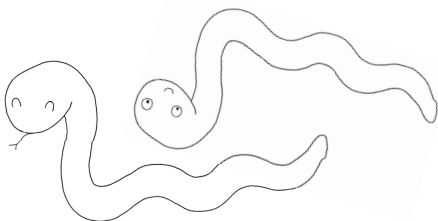

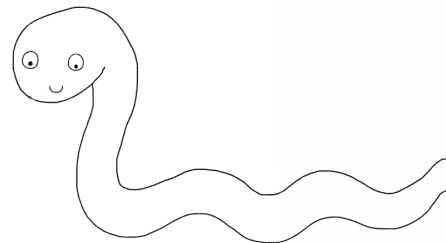

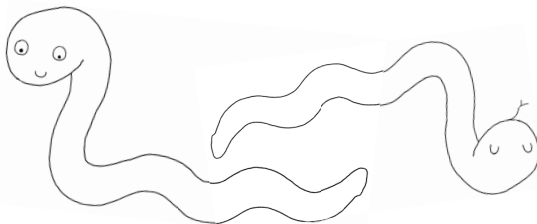

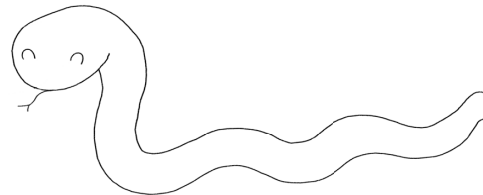

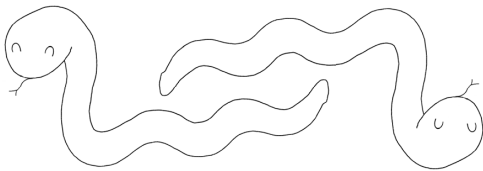

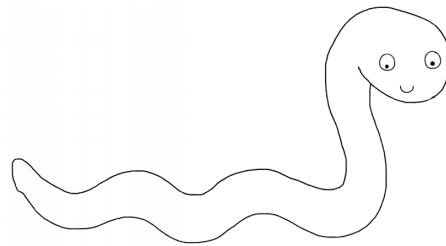

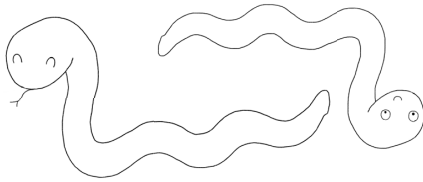

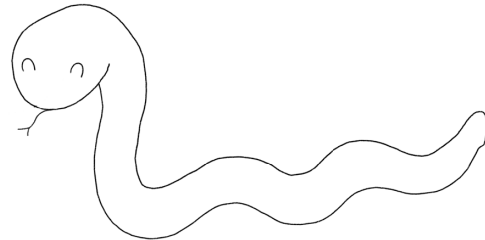

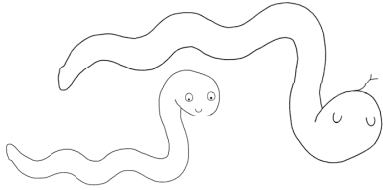

Counting objects in two groups

- I can count the number of objects in two groups and say how many there are altogether

You will need:

- 1–6 dice
- coloured pencils/ crayons/ felt-tip pens

What to do

- Roll the dice. What number is shown? Draw this number of spots onto the first small snake.
- Do the same again, but this time draw the spots onto the second small snake. Count the spots altogether on both small snakes. Draw this number of spots onto the large snake. Use a new colour for each set of snakes.
